

**Amendments to the Specification:**

Please replace paragraph 0028 with the following amended paragraph.

[0001] According to one embodiment, server 160 is configured with one or more page indexes 170 and algorithms for providing search results to users in response to search queries received from client systems 120 and 220. In certain aspects, server system 160 is additionally configured to provide novel, enhanced search query analysis and categorization functionality in response to search requests from client system 120 as will be discussed in more detail herein. Such query analysis and categorization functionality and other features are discussed in U.S. Patent Application Serial No. 60/510,220, filed on October 9, 2003, titled "SEARCH SYSTEMS AND METHODS WITH CONCEPTUAL CLUSTERING" (Atty. Docket No. 017887-011500US), and U.S. Patent Application Serial No. 10/712,307 [10/\_\_\_\_], filed on even date herewith, titled "SYSTEMS AND METHODS FOR SEARCH QUERY PROCESSING USING TREND ANALYSIS," (Attorney Docket No. 017887-011400US), the contents of which are incorporated by reference herein.
